- Member of the American, Swiss, French, South-african Societies for Surgery of the Hand

Competences

Hand surgery is at the crossroads of many specialties and aims to give back to the hand its function of a communication tool as well as a social link.

Its interest is focused on upper limb injuries whether they are traumatic, congenital, or degenerative. The bone, vascular, nerve, and plastic surgeries as well as microsurgery are all necessary skills to have to treat pathologies such as :

- Congenital hand differences
- Rheumatoid arthritis and osteoarthritis
- Fracture and joint injuries (non union, malunion, vascularised bone graft)
- Joint replacement (elbow prosthesis, wrist, hand, fingers)
- Trauma to tendons, nerves and secondary repairs (restoration of hand function after spinal cord injury, compartment syndrome, upper limb palsy)
- Dupuytren's contracture
- Cutaneous lesions (tumours, cysts, soft tissue defect, burns and hypertrophic scars, bedsores) and their cover (skin graft, pedicle flaps), nails deformities
- Microsurgery : replantations, free flap surgery, free vascularized toe transfer
- Wrist and elbow conditions : arthroscopy, wrist and elbow joint replacement
- Sports injuries to the hand and wrist
- Work and leisure related condition

Publications

Publications

75 peer-reviewed scientific publications and 86 book chapters in international text books.

80+ presentations at national and international meetings, including keynote speaker, moderator and chair

Books:

2015 - Papaloizos M, Chick G. Manuel de chirurgie de la main et du poignet, Pathologies chroniques de la main et du poignet (Hand and wrist chronic conditions) Paris, Masson-Elsevier, 345 p.

2014 - [Chick G, Papaloizos M. Manuel de chirurgie de la main et du poignet, Urgences \(Hand and Wrist emergencies\)](#). Paris, Masson-Elsevier, 320p.
