Memberships

- FMH : Board certified specialist postgraduate degree and is member of the Swiss Medical Association
- SVM
- SOFCPRE : French Society for Reconstructive and Aesthetic Plastic Surgery
- SOFCEP : French Society of Aesthetic Plastic Surgeons, which represents all the plastic surgeons with a strong activity in cosmetic surgery alone
- SORACEP : Local society for the plastic surgeons in Rhone-Alpes
- ISAPS : International Society of Aesthetic and Plastic Surgery

Competences

Doctor Jeremy Gliksman trained in France (former fellow and medical assistant). He has chosen to be mobile in order to work in state-of-the-art hospital departments, such as Paris, Lyon, Nancy and Mulhouse, and thus to learn the most advanced techniques in each area of his surgical activity.

Specialising in reconstructive and cosmetic plastic surgery, Doctor Gliksman is also qualified in micro-surgery and breast-reconstructive surgical techniques.

Depending on the clinical indications, Doctor Gliksman uses either cosmetic medicine or surgery. He is a member of the group of medical experts in aesthetic surgery who are charged with training the pharmaceutical industry. He performs all his procedures himself without delegating any task.

- 1,000 to 1,200 cases of injections per year on average
- 600 cases of interventions per year on average
- Expert in aesthetic medicine for the pharmaceutical industry: Sanofis, Galderma and Merz with facial rejuvenation courses given to doctors

LE POINT COSMÉTIQUE

LAUS DE L'ESTHÉTIENNE

Le point cosmétique est un espace dédié à la beauté et au bien-être. Il propose des soins personnalisés et des produits de qualité pour répondre à vos besoins spécifiques. Découvrez notre gamme de soins visage, corps et cheveux, adaptés à tous les types de peaux.

RECHERCHES D'ANATOMIE

Quelle est la structure de notre buste? Quels facteurs agissent sur sa fermeté? Comment préserver son maintien? Petite leçon d'anatomie.

LES SEINS ANATOMIQUES

Les seins sont constitués de tissu mammaire, de glandes mammaires et de tissu conjonctif. Leur fermeté dépend de la quantité de tissu conjonctif et de la production de collagène et d'élastine par les fibrocytes.

LES NOUVELLES PROTHÈSES ANATOMIQUES SONT PROPRES EN FORME DE COULIS D'EAU ET PERMETTENT UNE ADAPTATION PERSONNALISÉE À CHAQUE PATIENTE.

LE POINT COSMÉTIQUE

10 rue de la République, 92100 Nanterre
