Competences

Originating from Bremen, Dr. Volker Kirchner studied at the Faculty of Medicine in Geneva, working for ten years at Geneva University Hospitals (HUG) as Physician-Assistant in medicine, then in oncology and hematology before becoming Assistant Clinic Head. He then started a few months in Fundamental research in Geneva before flying to Harvard University in Boston, where he continued Fellowship training in research for a further three years.

Dr. Kirchner returned to Geneva as Head of Clinic at HUG for one year before returning to the United States. At the onset of the year 2000, he joined the famous Memorial-Sloan Kettering Cancer Center (MSKCC), in New York. He stayed there for a 2-year fellowship in onco-hematology. Since that period, he has kept close ties with the center and created synergies between Clinique de Genolier and MSKCC.

Upon his return to Switzerland, Dr. Kirchner worked for several years at Sonnenhof Hospital in the Lindenhof Group in Bern. After successfully obtaining FMH specialty certification, he joined Clinique de Genolier in 1998, where he set up his practice. Over the years, he has taken on multiple functions alongside his medical practice (Supervising Physician in charge of hemovigilance, pharmacovigilance and material vigilance for Swissmedic, (the Swiss authority for the control of therapeutic products) as well as being involved in Nyon regional politics and taking on further university studies to graduate with a postgraduate degree in Economics and Health Administration at the University of Economics (HEC) of Lausanne, followed by various postgraduate certificates and diplomas, more specifically in the fields of pharmaceutical and palliative care.

More recently, he added the position of Program Director of Genolier Cancer Center (GCC) and Executive Member of the Swiss Medical Network to his multiple functions.
